

## The Johannes Kepler University

The Johannes Kepler University (JKU) in Austria offers a new and innovative master's program in informatics for international students, with various unique courses for developing the creative, intellectual, communication and also social skills of the students.

The working language for this program is English, i.e. all the courses are taught in English and the communication language is English.

For very good or excellent students a variety of fellowships covering tuition and/or dormitory costs are available, offered by Austrian and international industrial companies, governmental and scientific institutions.

## Study right in the Center of Europe!
