Call for Papers

The International Journal of Networked and Distributed Computing (IJNDC)
A Formal Publication of the International Association for Computer and Information Science (ACIS)

The *International Journal of Networked and Distributed Computing* publishes original articles on both theory and practice which address foundations, crucial challenges, state-of-the-art solutions and implications on all aspects of networked and distributed computing.

This journal publishes original research articles, surveys and reports of practical experience. Occasionally, special issues will be published on topics of particular interest and proposals for such issues will be invited accordingly. Topics of interest include, but are not limited to, communication protocols (wired or wireless), collaborative computing, pervasive and ubiquitous computing, Internet computing, smartphone computing and applications of networked and distributed computing to healthcare, education, nano-technology, space/sea exploration, energy management, entertainment, etc. Topics covered in the journal also include techniques and methodologies for modelling, developing, validating, maintaining and re-engineering networked and distributed computing software systems and their environments.

Domains of application covered in the journal:

- Control systems
- Consumer electronics
- Cyber-physical systems
- Decision-support systems
- E-science and technology
- Expert systems
- Human-machine interface
- Information systems
- Intelligent knowledge retrieval
- Knowledge visualization
- Multimedia
- Operating systems
- Signal and image processing
- Pattern recognition
- Real-time embedded systems
- Robotics
- Virtual reality
- Nano-technology
- Telecommunications
- Grid computing
- Cloud computing
- Pervasive and ubiquitous systems
- Web-based systems
- Internet
- Smartphones
- Healthcare
- Energy management

The *International Journal of Networked and Distributed Computing* is currently indexed in the Directory of Open Access Journals (DOAJ), Ulrich's Periodicals Directory (Ulrichsweb), Google Scholar, Clarivate's Emerging Sources Citation Index (ESCI; one of the *Web of Science* core collections) and Scopus. We are expecting to have the IJNDC journal indexed by SCI by soon.

To submit your paper, please visit https://www.atlantis-press.com/journals/ijndc/submit-your-paper for instructions.
